Not right now. The way the GeoPlatform is configured, you have to be a GeoPlatform administrator to be able to access that iframe html code and I am not an admin. That code looks like it is generated after you make selections regarding map size, zoom control, etc. I spoke with Harvey after you came down and he will expedite the process and bypass some parts of the SOP to make it available more quickly.

Can you send me the link to the page that uses the iframe?

Below is the direct link to the demo map. I adjusted the sharing settings, so you should not need to be a member of the HQ EOC Gold King group to access.

Either that or I can quickly set up an Adobe connect webinar and we can discuss over the phone.

Subject: GeoPlatform Map for Gold King

Hi Danny,

I just spoke with George and he said you would be the best person to contact regarding integrating a GeoPlatform map into the www2.epa.gov/goldkingmine web page. I understand that you and your folks would like to see what a potential map would look like to evaluate it as an option. I downloaded the data from the site and have added to a GeoPlatform map that I can give you a quick demo of. I would need to do more work

configuring of the data and map if it's decided to move forward with it, but I didn't want to go much further until that time.

As I mentioned before, the GeoPlatform map can be directly embedded into the epa.gov webpage by copying/pasting the iframe html code. I spoke with Harvey about it and he offered to help expedite the process if we decide to go that route. Let me know if you'd like to see what I have and talk further.
